## Index

- absorber, 18, 24–28, 36–38, 57, 67, 106, 119, 160
  - condition, 37, 38
  - ideal, 5, 25, 147
  - theory, 20, 24, 34–38
- acceleration, uniform, 31, 148–150, 152, 153
- action at a distance, 18–20, 22, 24, 28, 34, 35, 38, 42, 61, 63, 67, 86
- anthropic principle, 84
- attractor, 2, 3, 66, 78–81
  
- background radiation, 27, 147, 156–158, 160
- big bang, 26, 36, 64, 133, 139, 153–155, 157, 159, 168, 170, 178, 181, 182, 192, 196
- big crunch, 57, 153, 155, 158, 159, 170, 182, 196
- bipartite system, 98
- black hole, 112, 137–149, 152, 156, 158, 178, 193, 194, 196, 197
  - dynamics (laws of), 146
- black-and-white hole, 196
- Bloch equation, 116, 117
- block universe, 6, 161, 193, 199, 200
- Bohm’s quantum theory, 92, 126, 127, 192, 193
- Borel’s argument, 56, 96, 110, 160
  
- Caldirola equation, 33, 66
- canonical distribution, 49, 50, 78, 80, 93, 152, 177
- Casimir effect, 123, 152
  
- causality, 2, 18, 22, 83, 119, 121, 156–158
  - horizon, 157
  - intuitive, 3, 18, 56, 60, 62, 76, 121, 131
  - microscopic, 56, 60, 158
  - quantum, 131, 133, 191, 197
- cellular automata, 80
- chain of collisions, 46
- chaos, 56, 72, 77, 78, 91, 99, 102, 106, 200
- chirality, 106, 108, 111, 148
- closed system, 39, 42, 57, 71, 73, 75, 78–80, 159
- closed time-like curves, 15, 16
- cluster expansion, 50
- coarse-graining, 53, 54, 56–60, 67, 68, 88, 91, 128, 203, 204
- coherence vector, 117
- coherent state, 111, 184
- collapse of wave function, 5, 92, 106, 116, 118, 125, 126, 128–131, 133, 144, 160, 174, 192, 201
  - advanced, 131, 132
  - apparent, 129, 148, 175, 177
- complementarity, 105, 125
- complexion, 71
- consciousness, 11, 14, 103, 107, 130, 199
- controlled-not gate, 99
- Copenhagen interpretation, 125, 129
- cosmic censorship, 142
- cosmic fluctuation, 82, 155
- counterfactual, 9, 107

- CP violation, 3, 4, 175  
 CPT invariance, 4, 41, 121, 144
- decoherence, 16, 56, 60, 91, 101–115, 118, 122, 124, 128, 129, 133, 134, 144, 148, 155, 160, 172–174, 179, 180, 185, 187, 188, 191, 192, 196, 201  
   functional, 105  
 degradation of energy, 76  
 density matrix, *see* density operator  
 density operator, 85–88, 92–97, 109, 112, 114–117, 122, 123, 125, 128, 134, 144, 151, 174, 177  
 detector  
   accelerated, 31, 112, 148, 150, 153, 197  
   inertial, 31, 148  
 delocalization of superposition, 128, 130, 133, 134, 202  
 dispersion of wave packet, 104, 105, 111, 113, 122, 187  
 dispersion relation, 121  
 dissipative structure, 77, 79  
 document, 7, 16, 18, 40, 66, 82–84, 155, 193  
 doorway state, 63, 120  
 double standard, 42, 134, 139  
 dynamical map, 79–81, 115–118  
 dynamics  
   alternating, 65  
   autonomous, 44, 54, 61, 89  
   intrinsic, 56, 180, 182, 193, 196  
   macroscopic, 72, 129  
   of ensemble, 48, 51  
   stochastic, 42, 56, 66, 67, 78, 88, 92, 102, 104, 113, 114, 118, 119, 122, 124, 134, 201, 203  
   unitary, 87, 91, 100, 119, 144
- Einstein field equations, 15, 141, 142, 154, 155, 162, 178  
 emergence of classical properties, 103, 105, 188, 191, 202  
 ensemble  
   apparent, 96, 97, 103, 106, 113, 115, 118, 123, 124, 128, 152  
   of Hamiltonians, 56, 101  
   of wave functions, 53, 87, 88, 94–96, 98, 104  
   representative, 40, 48, 51, 56, 69, 70, 77, 97  
 entanglement, 5, 16, 86, 94–101, 104, 111, 112, 114, 115, 126, 133, 143, 144, 148, 152, 173, 179, 201, 202  
 entropy  
   Boltzmann, 43, 46, 49  
   capacity, 56, 63, 64, 110, 137, 156  
   density, 60, 67, 97  
   ensemble, 48, 49, 51, 53, 58, 60, 67, 71, 76, 80, 81, 87, 88, 95, 100, 125, 126, 129, 130, 204  
   Gibbs, 48, 53, 54  
   Kolmogorov, 72  
   linear, 52, 65, 98  
   mixing, 49  
   of black hole, 146, 147  
   of lacking information, 68, 71, 74, 82, 98, 129  
   phenomenological, 39, 60, 67, 78  
   physical, 51, 60, 70, 73, 74, 77, 78, 80, 82, 106, 156, 174, 176  
   relative, 66, 80, 116  
 equation of motion, 28, 32, 33, 78  
 equivalence principle, 31, 150, 152, 153  
 ergodic, 25, 42, 51, 55, 71, 83, 102, 143, 159  
 event horizon, 112, 143, 148, 152, 194, 197  
 Everett interpretation, 103, 127, 128, 132–134, 173–175, 180, 190, 191, 193  
 evolution, biological, 5, 77, 82  
 extension in phase, 48, 51
- fact-like, 4–6, 32, 103, 119, 121, 127, 133, 174, 175  
 Fermi's Golden Rule, 91  
 final condition, 4, 23, 40, 57, 67, 144, 159, 160, 169, 192, 197  
 final value problem, 23  
 flow of time, 5, 7, 11–13, 15, 24, 202  
 fluctuation–dissipation theorem, 78, 81  
 Fokker–Planck equation, 66  
 fork of causality, 18, 99, 100  
 fork of indeterminism, 18, 66, 80, 100, 132

- forward determinism, 66, 79–81
